

Planning Commission Agenda Item

Date: May 12, 2021

Item No: 14.

TO: Planning Commission

FROM: Marc Jordan, Director Land Development & Community Services
Prepared By: Robert Eastman

SUBJECT: T-MAP-08-2021 VILLAGES @ TULE SPRINGS PARCEL 1.02.

Applicant: DR Horton, Inc. Request: A tentative map in an R-CL-PCD (Medium Density Residential-Planned Community District), to allow a 124-lot, single-family subdivision. Location: Along the Elkhorn Road alignment and approximately 787 feet west of Niles Wild Drive. (Ward 4)

RECOMMENDATION: APPROVAL WITH CONDITIONS

PROJECT DESCRIPTION: (APN 124-16-311-002)

The applicant is requesting consideration for a tentative map in an R-CL-PCD, Medium Density Residential-Planned Community District to allow a 124-lot, single-family residential subdivision. The subject site is approximately 29.80 acres in size with a density of 4.16 dwelling units per net acre. The site is generally located along the Elkhorn Road alignment and approximately 787 feet west of Niles Wild Drive within the Villages at Tule Springs Master Planned Community.

BACKGROUND INFORMATION:

Previous Action
Ordinance 2888 (ZN-14-18) was approved by the City Council on August 1, 2018 reclassifying the site from the MPC-RZ 6 and MPC-RZ13, Master Planned Community Planned Community District to R-CL PCD, Medium Density Residential-Planned Community District.
The City Council Approved the Second Amended and Restated Development Agreement for Park Highlands East on June 3, 2015 – The Development Agreement created the Villages at Tule Springs Master Planned Community.

ANALYSIS:

(NOTE: The proposed development is located within the Villages at Tule Springs Master Planned Community. The Master Planned Community is regulated by a Development Agreement and has development standards and design guidelines that deviate from the standard code requirements.)

The applicant is requesting approval for a 124-lot residential tentative map on approximately 29.8 net acres for a density of 4.16 dwelling units per net acre. The subject site is Parcel 1.02 within Village 1 of the Villages at Tule Springs. The parcel is generally located along the Elkhorn Road alignment and approximately 787 feet west of Niles Wild Drive. The subject site's existing land use is Single Family Residential (SRF 5.1-7.4 du/ac) and the existing zoning classification is R-CL-PCD, Medium Density Residential-Planned Community District. Typically subdivisions with this land use have a density between 5.1 and 7.4 dwelling units per acre, however, the Villages at Tule Springs zoning classification of R-CL-PCD allows for a density range of 2.0 up to 7.4 dwelling units per acre. The VTS Parcel Density Cap Table included as part of the Development Agreement allows a maximum of 196 dwelling units to be developed on Parcel 1.02.

The tentative map indicates one access off of Elkhorn Road to the subdivision however, a secondary emergency access may need to be provided. If required, a secondary emergency access could be added to the cul-de-sac located at the southern end of 10th Drive. The residential subdivision is proposed to be gated with an internal street network that includes 47-foot-private streets with five (5') foot sidewalks on both sides of the street.

Perimeter landscaping along Elkhorn Road will be provided by the Village Developer. The required pathway is 25 feet in width with an eight (8) foot wide sidewalk centered within the landscaped area. Trails run along the north and east boundaries of the site between subject site and parcels 1.01, 1.03 and 1.05. According to the Village at Tule Springs Development Standards "Where cul-de-sacs end adjacent to trails or pathways, including along arterial and collector streets, pedestrian connections shall be made to the sidewalk with the trail or the pathway." The pedestrian connections should be a minimum of 5-feet in width. Pedestrian connections are required be added to the following cul-de-sacs: 9th Drive, 10th Drive, 13th Drive, 14th Drive and 15th Drive. Pedestrian connections should also be added to Common Elements E & G, both of which connect to a trail or pathway.

The minimum lot area allowed within the R-CL-PCD, Medium Density Residential District is 3,500 square feet with a minimum lot width of 35 feet. The proposed tentative map contains 124 single-family lots that range in size from 7,009 to 18,001 square feet, with a typical width of 60 feet. All lots will contain a minimum rear yard area of 600 square feet, therefore, the applicant is not required to provide any private open space. Therefore, all of the lots are in conformity with the requirements of the Villages at Tule Springs Development Standards.

According to the letter of intent, the subdivision will include six (6) models, each with three (3) different elevations, with single story homes adjacent to Aliante. The letter of

intent further states that the home sizes will range in size from 2,300 to 4,425 square feet and include two or three car garages. The Villages at Tule Springs Development Standards requires six (6) model home for each single-family detached development. Additionally, all homes adjacent to Aliante Master Planned Community shall be single-story. The lots required to have single-story homes are lots 35 through 74. The review of the model homes will be completed during the building permit process.

The proposed tentative map is generally consistent with the Development Agreement land use plan, and zoning district for the Villages at Tule Springs. The lots, internal streets and trail connections can comply with the development standards for the master planned community with minor modifications. Approval of the proposed tentative is warranted.

CONDITIONS:

Planning and Zoning:

1. Unless expressly authorized through a variance, waiver or another approved method, this development shall comply with all applicable codes and ordinances, including the Second Amended and Restated Development Agreement for Park Highlands East (Villages at Tule Springs), and the Villages at Tule Springs Development Standards and Design Guidelines.
2. All homes adjacent to Aliante Master Planned Community including lots 35 through 74 shall be single-story.
3. Pedestrian connections to a trail or pathway shall be added to the cul-de-sacs on 9th Drive, 10th Drive, 13th Drive, 14th Drive, 15th Drive and Common Elements E & G.

Public Works:

4. All known geologic hazards shall be shown on the preliminary development plan, tentative map and the civil improvement plans. Geological hazards such as fault lines or fissures affecting residential structures may substantially alter the tentative map layout and require the submission of a revised tentative map which must be approved by the City prior to final approval of the civil improvement plans. The footprint of proposed structures shall be plotted on all lots impacted by faults and/or fissures and a minimum width of five (5) feet shall be provided from the edge of any proposed structure to the nearest fault and/or fissure.

5. Approval of a drainage study is required prior to submittal of the civil improvement plans.
6. Proposed residential driveway slopes shall not exceed twelve percent (12%).
7. All common elements shall be labeled and are to be maintained by the Home Owners' Association.
8. The street names shall be in accordance with the North Las Vegas Street Naming and Address Assignment Standards, and must be approved by the City of Las Vegas Central Fire Alarm Office.
9. Approval of a traffic study is required prior to submittal of the civil improvement plans. Please contact Traffic Engineering at 633-2676 to request a scope. A queuing analysis may be required.
10. All driveway geometrics shall be in compliance with the *Uniform Standard Drawings for Public Works' Construction Off-Site Improvements* Drawing Number 222.1.
11. The size and number of access points and their locations are subject to review and approval by the City of North Las Vegas Traffic Engineer and must meet the standards set forth in *North Las Vegas Municipal Code* section 17.24.040. Conformance may require modifications to the site.
12. The public street geometrics and thickness of the pavement sections will be determined by the Department of Public Works.
13. Dedication and construction of the following streets and/or half streets is required per the *Master Plan of Streets and/or Highways* and *City of North Las Vegas Municipal Code* section 16.24.100:
 - a. Elkhorn Road
 - b. Golden Buckwheat Drive
 - c. Tule Springs Parkway
14. All Nevada Energy easements, appurtenances, lines and poles must be shown and shall be located entirely within the perimeter landscape area of this development. Distribution lines, existing or proposed, shall be placed underground if impacted by the proposed development of the parcel or if the pole impedes upon the proper ADA clearances for sidewalk. Under no circumstances will new down guy wires be permitted.

15. The developer shall provide an offsite phasing plan that includes proposed dates of completion for orderly construction of the supporting offsite street improvements. The offsite phasing plan must be submitted for review and approval to the Department of Public Works prior to issuance of the project's grading permit.
